

Create Mac Icon to Start TG Program

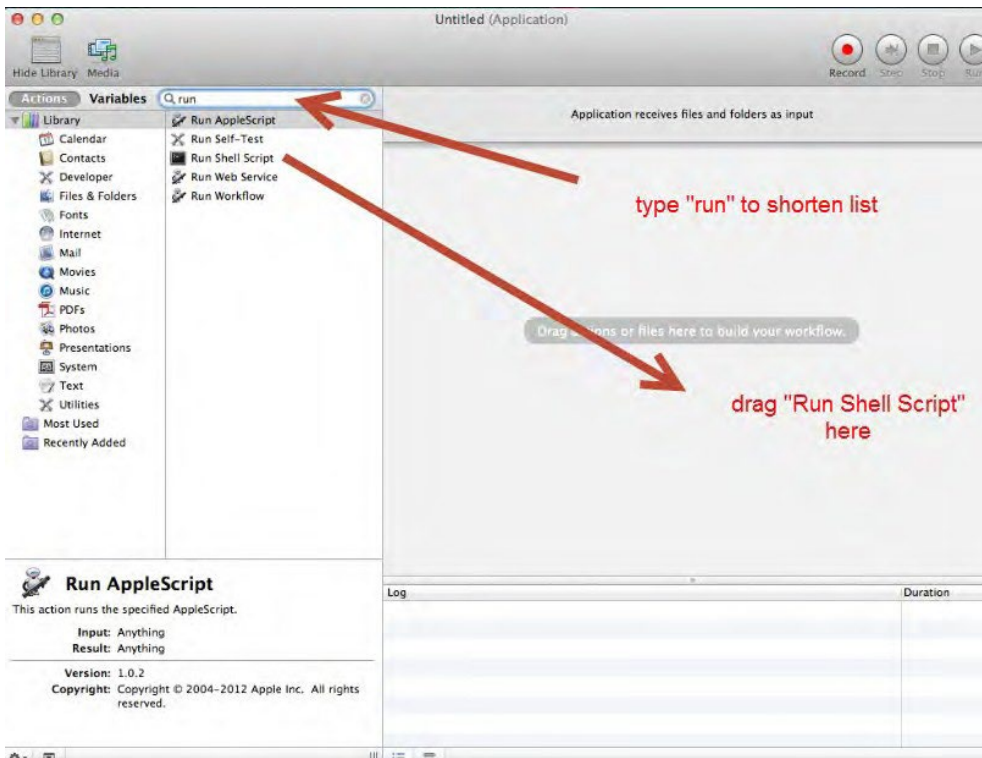

1. Select Search icon, and type "automator"

2. Select "Application" and click "Choose"

3. Type "run" to shorten list and drag "Run Shell Script" onto work area

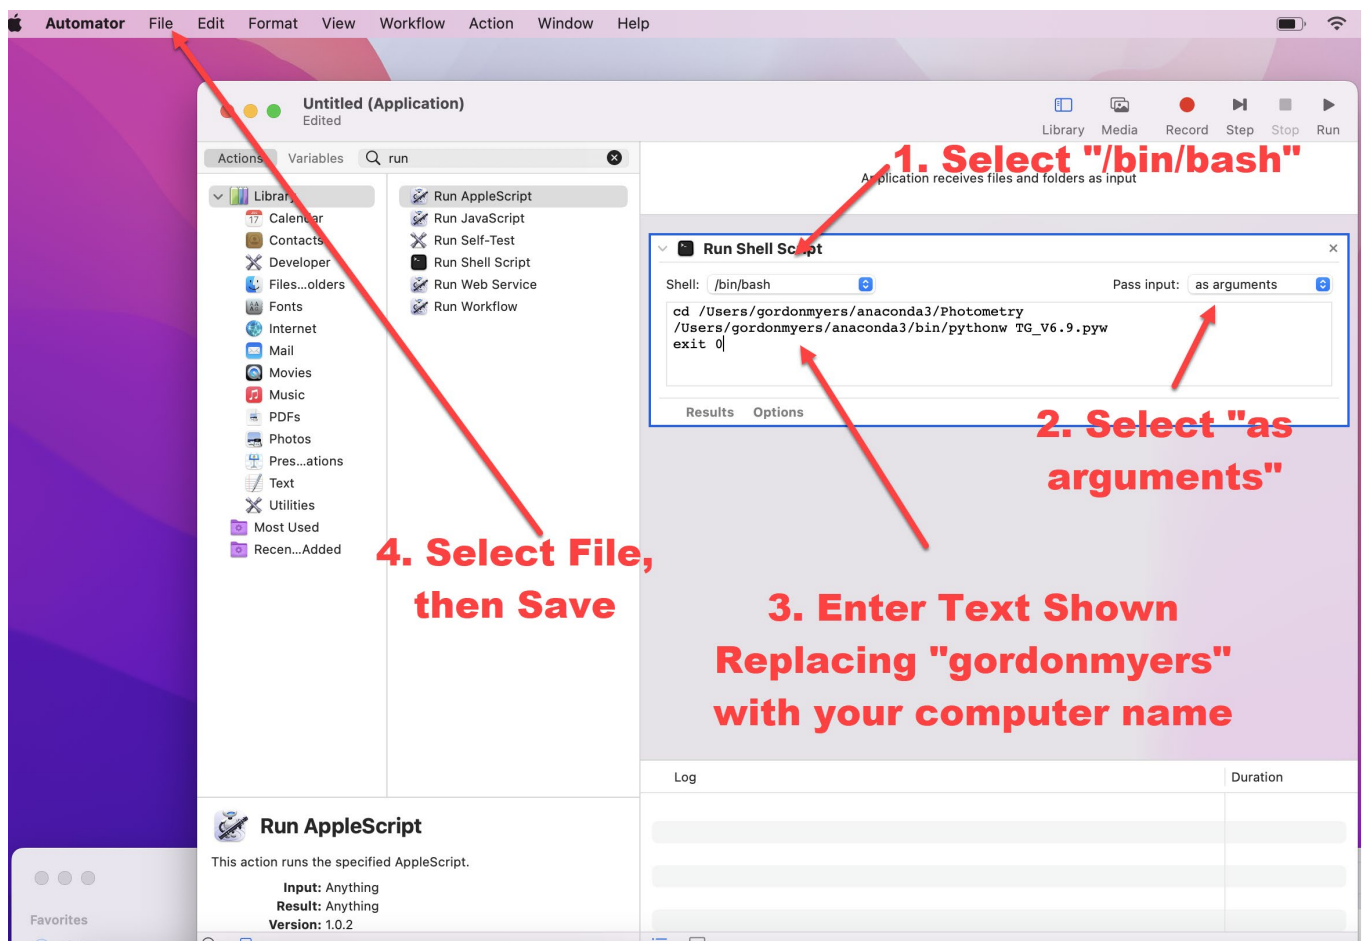

4. As shown below, select “/bin/bash” , “as arguments”, the text shown below, and finally select File → Save

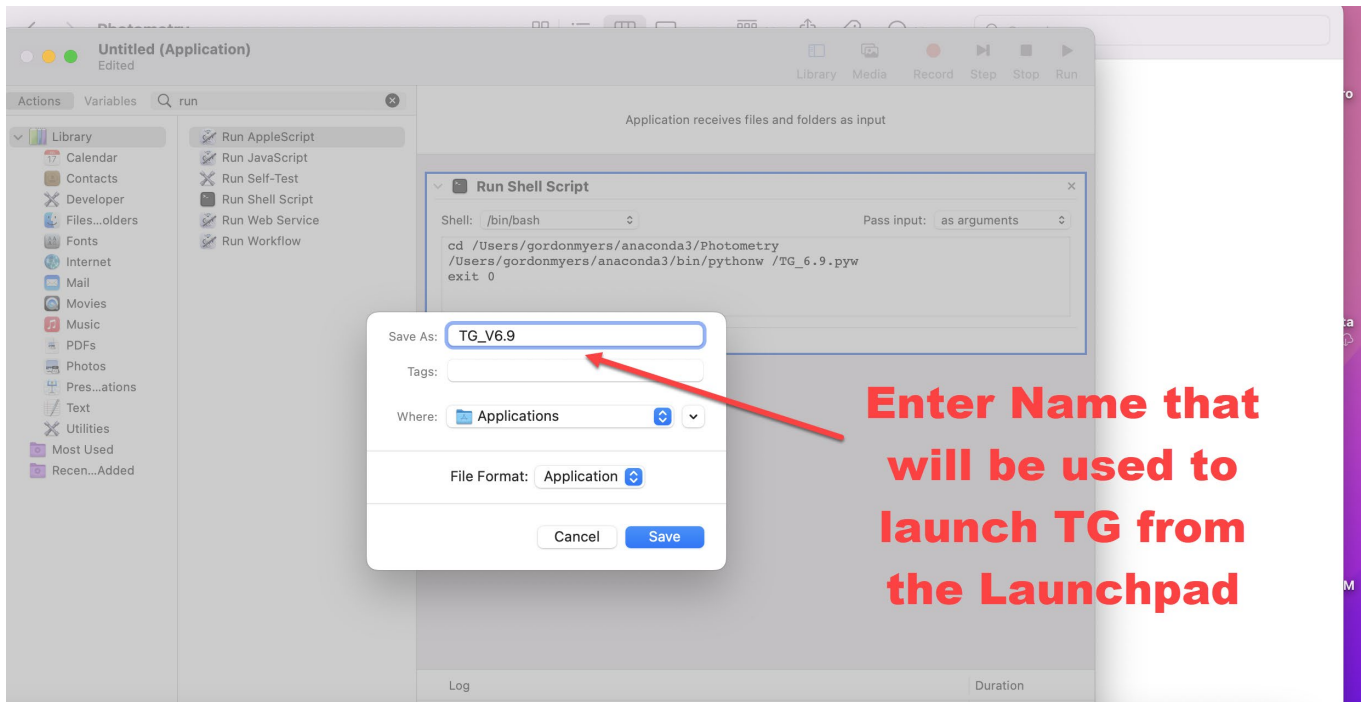

The text to be entered is:

```
cd /users/yourusername/anaconda3/Photometry
/Users/yourusername/anaconda3/bin/pythonw TG_V6.9.pyw
exit 0
```

Note: Leave a space between ‘pythonw’ and “TG_V6.9.pyw”

5. Enter name to be shown on LaunchPad and save

The icon to start the program will be on the LaunchPad
